## Watch hannah montana movie online 1080p

Source: Thinkstock You probably already know that DVDs and Blu-ray discs are slowly but surely going the way of the VHS tape as people increasingly switch to online services to buy, rent and watch movies. While some may mourn the loss of tangible in our everyday life, watching movies online eliminates problems with losing or damaging fragile discs and makes movies available on various platforms so you can watch movies you own anywhere, anytime, without having to remember to grab your DVDs. Of course downloading and streaming illegally is very popular, but it deprives many people who have worked on making a film about the compensation they deserve for their blood, sweat and tears. In addition, the available options can often be substandard and you risk infecting your computer or mobile device with a virus if you don't know what you're doing. Here is a guide to many different legal ways to watch movies online for those unfamiliar with the process they are scratching to free themselves from scratched DVD hell. Yes, it will cost you a little money, but there are many advantages over traditional DVDs and illegal downloads. Streaming services There is a litany of options for viewing content online. One of the more popular methods is the use of online streaming services such as Netflix, Hulu Plus or Amazon's Prime Instant Video. These services charge a monthly or annual fee and give you access to tons of content, although there's always the possibility that the specific movie you're looking for won't be on any streaming service you have. The content these services have access to always changes as they enter into new deals, so you don't get stuck with the same options month after month. These services are also great for watching TV and have started recording their own original shows to compete in the TV market. Many of these shows, such as Netflix's House of Cards and Orange is the New Black, have received glowing reviews. There are some limited streaming options online that are both legal and free. Crackle is a website that offers movies and TV shows for streaming for free, but it's supported by ads and eventually you'll see as many commercials as you'd watch programming on cable. The amount of content Crackle offers is also a slimmer choice than subscription services, as the site doesn't have the financial muscle to buy giant content like larger sites, so it might be harder to find your favorite movie. The lack of an online streaming service is that you are at the mercy of the content the company has at its disposal to offer; You can't just choose any movie under the sun and be guaranteed to be able to watch it. You also don't own movies, so if Netflix get rid of your favorite movie, you won't be able to watch it. Downloading One way to own movies and watch them online is to download them. Whether you're a Google or Apple fan, iTunes and Google Play will remember where you are in the movie if you're interrupted and want to switch from tv to tablet or smartphone. Amazon offers movies to buy or rent at similar prices to Apple and Google, and you don't need a Prime membership to access that service. Whether you prefer owning or streaming movies, watching movies online is a way to go if you're tired of dealing with DVDs and Blu-ray discs. There are a lot of safe, legal options that don't cost too much and allow you to watch on all your devices when it suits you. Watch Entertainment Cheat Sheet on Facebook!
